

## Sensorion: reporting of the General Assembly

**Montpellier, 29 May 2019 – Sensorion (FR0012596468 – ALSEN)** a pioneering clinical-stage biopharmaceutical company which specialises in the development of novel therapies to restore, treat and prevent inner ear diseases such as hearing loss, tinnitus and vertigo held its combined general meeting on May 28, 2019.

The Combined Ordinary and Extraordinary General Shareholders' Meeting, held in Paris on May 28, 2019, under the chairmanship of Patrick Langlois, adopted the resolutions submitted to the vote of the general meeting, including the approval of the 2018 company financial statements and the renewal of delegations and financial authorizations (with the exception of resolution 20 concerning the authorization of a capital increase reserved for employees participating in a PEE, "Plan Epargne d'Entreprise", company' saving plan).

Patrick Langlois introduced the session by indicating that the year 2018 was marked by an important increase in research and development spending due to the progression of SENS-111 clinical trial in acute unilateral vestibulopathy (AUV) and the start of the phase 2 SENS-401 in Sudden Sensorineural Hearing Loss (SSNHL).

As a reminder of the press release of May 27th, 2019, the recent signature of the partnership framework agreement with Institut Pasteur on gene therapy programs targeting hearing loss was mentioned.

Finally, in order to meet the Company's cash requirements and ensure going concern, it was reminded that the company was actively seeking financing from institutional investors as well as from public and private entities. financial institutions for grants and / or repayable advances relating to the Company's research programs.

The main events expected for 2019 are summarized below and appear in the presentation of the general assembly available on the website.

| Events  | Expected Timing |
|---|-----------------|
| Clinical results on phase 2 SENS-11 AUV               | H2 2019         |
| Intermediate phase 2 read out in SENS-401 SSNHL       | H2 2019         |
| Follow up of preclinical studies with Cochlear        | H2 2019         |
| Starting preclinical studies in Gene therapy programs | H2 2019         |

### About Sensorion

Sensorion is a pioneering clinical-stage biopharmaceutical company, which specializes in the development of novel therapies to restore, treat and prevent inner ear diseases such as hearing loss, vertigo and tinnitus. Our clinical-stage portfolio includes two phase 2 products: Seliforant (SENS-111) under investigation for acute unilateral vestibulopathy and Arazasetron (SENS-401) for sudden sensorineural hearing loss (SSNHL). We have built a unique R&D technology platform to expand our understanding of the physiopathology and etiology of inner ear related diseases enabling us to select the best targets and modalities for drug candidates. We also identify biomarkers to improve diagnosis and treatment of these underserved illnesses.

We are uniquely placed through our platforms and pipeline of potential therapeutics to make a lasting positive impact on hundreds of thousands of people with inner ear related disorders; a significant global unmet need in medicine today.
